A LEXICON

ABRIDGED FROM

LIDDELL AND SCOTT'S

GREEK-ENGLISH LEXICON.

THE SIXTH EDITION.

OXFORD:
AT THE UNIVERSITY PRESS.
M.DCCC.LVIII.

ADVERTISEMENT.

THE following Abridgment has been made from the larger Lexicon published at the University Press.

It has been reduced to its present compass by the omission—

I. Of passages cited as Authorities, except where examples were necessary to explain more clearly the usage of a word.

II. Of discussions upon the Derivation of words.

III. Of words used only by late authors, or of the particular meanings of words not in general use, such as medical or scientific terms: but words used by Theocritus, the writers of the Anthology, Lucian, and Plutarch in his Lives, have been retained; and especial care has been taken to explain all words contained in the New Testament.

Words are printed in Capitals, when they are radical forms, or when no form nearer the original Root is known to exist. In other words, the Derivation, when it can be sufficiently ascertained, is usually placed before the meaning: when this is not the case, some notice will be found at the end of the word.

Many additional tenses and cases, mostly Homeric or Doric, have been inserted to give a clue to the simple word, when there seemed to be any difficulty or irregularity in the formation. The quantity of doubtful syllables has been marked, except in the case of tenses of Verbs, cases of Nouns, and words derived according to grammatical rule.

The present Edition has been revised throughout, from the fourth Edition of the original Work.

For the sake of clearness, the parts of which compound words are made up have been marked by placing a hyphen between them, as, ἀπο-βάλλω, ἀφ-ήμι, ἄ-βαρος, ἔφ-οδος. But when a word is compounded of two parts, one of which is already a compound, this latter compound is left undivided, and must be sought in its own place, as φιλο-κισσοφόρος. And a word immediately derived from a compound is left undivided, so that the composition must be sought under the word from which it is derived, as φιλομονσέω, φιλό-μουσος. In Verbs compounded of a Preposition and a simple Verb, mere division has been considered sufficient to mark the formation, as also in some Nouns formed from a Preposition and a simple Noun.

All tenses and forms of words in the Gospels that presented any difficulty have been inserted in their place.

fut., *ἀν* expresses that which *certainly will happen, if something else happens first*. With imperf., *ἀν* expresses the frequent repetition of an act under certain circumstances, *ἔλεγε ἀν* he would say (when-ever he had an opportunity); *κλαίεσκεν ἀν* he would keep on weeping.

The oldest form of Eta (Η) was a double ε, and prob. it was pronounced as a lengthd. ε as ὅλος, ζῆλος, from δέλος, ζέλος. The old Alphabet had only one sign (ε) for the sound of e both long and short, till the long vowel η, with ω, was introduced from the Samian into the Athenian alphabet in the archonship of Euclides, B.C. 403. The sign H, before it represented long ε, was used for the rough breathing, as ΗΟΣ for ὅς, which usage remains in the Latin H. When the same H became a vowel, it was divided, so that Η represented the rough, ἦ the smooth breathing, whence came the present signs for the breathings. η was most in use among the Ion. ; in the Attic dialect, it often passed into α, as Ion. πρήσσω, θάρης, are in Att. πράσσω, θάραι. In later Att., εἰ and ηῖ were not seldom changed into η, e.g. κλειθρα κῆθρα, Νηρηίδες κῆρηδες.

I

I, ι, ἰωτα, τό, indecl., ninth letter of the Greek Alphabet. As numeral, ι' = 10, but ι = 10,000.

The ι subscriptum was always adscriptum or written by the side, not under (as τωι, not τῷ), till the

13th century. In Capitals it is still so written, as *TIL*.

It was easily exchanged with *ει*, whence forms like *ἰως ὠλλω*, *εἰλη ὠλη*: *ι* was sometimes exchanged with *ε*, as *ἰστία ἰστη*: but more frequently it is inserted to lengthen the syll., as in *εἰν εἰς ξείνος κενός* *καὶ παρὰ* for *ἐν ἐς ξένος κενός* *διὰ παρὰ*.

The Quantity of *ι* varies.
